

School Climate Data Reflection

This worksheet is designed to help teachers connect their classroom experiences to school climate data by comparing their expectations with the actual results. Use the space below to reflect on areas where classroom observations align with the data, where they differ, and what questions or insights emerge.

Instructions: For each school climate aspect listed below, begin by writing what you expect the data to show based on your day-to-day classroom experience. Then review the actual reported data and compare it with your expectations. Note any gaps, alignments, insights that arise from this comparison. After completing the worksheet, use these observations to support classroom discussions, guide professional learning, and inform strategies for improving classroom and school climate.

Aspect of School Climate	My Expectation	Reported Data	Alignment/Insights
Teaching and Learning			
Student Support and Relationships			

Social and Emotional Learning			
Staff Support			
Family Involvement			
Interactions with Teachers and School Leadership			
Safety, Security, and Student Behavior
